## DETAILED ACTION

### *Allowable Subject Matter*

The following is an examiner's statement of reasons for allowance: The invention is drawn to a method for preparing furan polymer impregnated wood, comprising

impregnating wood in one impregnation step with a polymerizable furfuryl alcohol monomer solution, said solution containing, based on the weight of the solution, from 4.8 to 33.3 % furfuryl alcohol, from 1.9 to 5.1 % of **borax**, from 1.9 to 5.1% of maleic anhydride or maleic acid or a combination thereof as a polymerization initiator for the polymerization of the furfuryl alcohol, and the balance **water**;

and curing the impregnated wood at a temperature in a range of from about 70 to about 140 C to form furan polymer impregnated wood having a furan polymer content of from **6.3 to 48.3%** based on the weight of the wood.

While methods of impregnating wood with polymerizable furfuryl alcohol and subsequent curing or polymerizing the furfuryl alcohol are known in the art, see, for example, Hess '084 or '995, or Giebeler (all of record), none of the prior art references disclose impregnating wood with solution containing major amount of **water**, and **borax**, so as to achieve the claimed furan content in the impregnated wood.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
